

Peer 2 Peer by Teenergizer

by Yana Panfilova

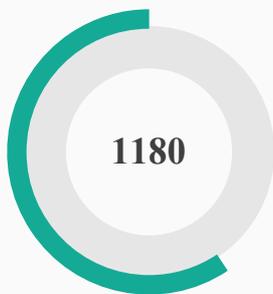

General information about HIV/AIDS in Ukraine

Some numbers

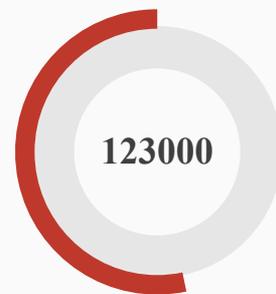

Ukraine population

Young people live with HIV officially

Young people live with HIV

Teenagers are in risk group

Why Peer 2 Peer consultations and trainings are so important

01

Lack of good teachers at Ukrainian schools

It's really hard for teachers from Soviet Union to teach children something about reproductive health, HIV and other things like this. Most of them think, that it's **improperly** to speak with teenagers about sex. Also they transmit a lot of wrong information because of old-style background

02

Personal connection

Some people we consult become activists in future and help us in our work

03

Efficiency

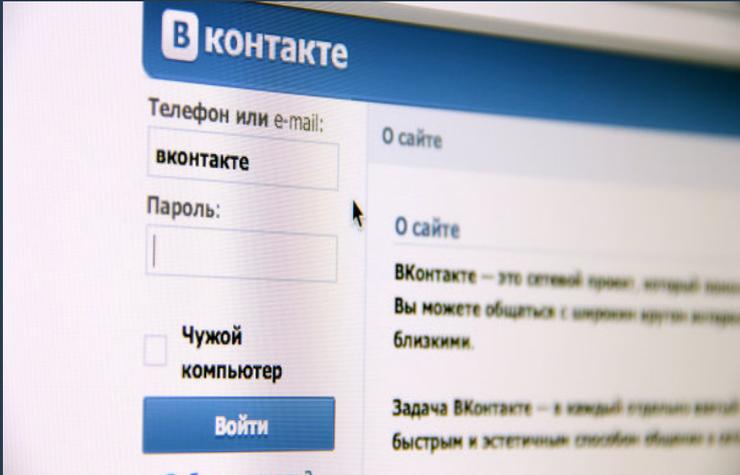

Peer 2 Peer is a really good way to encourage teenagers to take therapy, get test. It's also works great in groups of young people, who never communicated with people, living with HIV

04

Control

You can convince someone to take therapy, for example. And if this someone will stop taking pills, you can easily say him/her, that they are wrong. Because you are equal, this person will understand it, instead of protesting or ignoring you. Teenager will listen teenager opinion much more, than older person opinion

Ways we work with P2P

Personal consultations

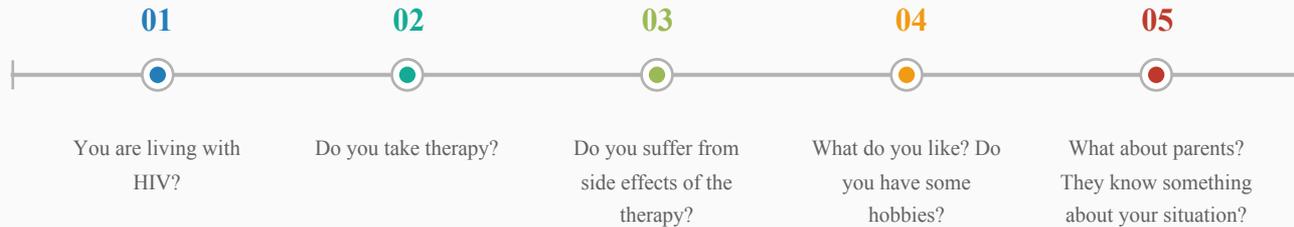

Trainings at schools and other groups of teenagers

Ways to consult people P2P personally

Questions, you should ask during consultation

Important issues

01

Try to answer ASAP.
You are supposed to
answer during one
day

02

Such consultation is a
long-term process.
You will spend
probably 1-3 month to
encourage somebody
to take therapy or pass
the HIV test

03

Your goal – to
become a friend to
person you are
consulting

04

If somebody will
write you first, it will
be much easier to
consult him/her

05

At some point you
can start to encourage
person, you are
consulting to become
an activist
